I'm a Flight Attendant for America West Airlines. I am against having Passengers using cell phones while inflight. It will cause a very dangerous situation if there was an emergency on board. It will cause a serious security breach if terrorists are on board and communicating with cohorts on the ground. Not to mention the noise level in the cabin, disturburance of other pax, lack of attention to FA's instructions, and just a general lack of curtersy to those around them who would use their phones. Very bad idea to implement this policy.
